

Supply the Sky

The extension of your aerospace business

Aerospace Supply Chain Challenges

In aerospace, logistics excellence is crucial for the efficiency of production lines and the reliability of airline operations. The movement of engines is a significant link in the aerospace supply chain. With Engine Logistics, Kuehne + Nagel is at the forefront of the aerospace industry. As part of the Kuehne + Nagel aerospace logistics program "Supply The Sky", Kuehne + Nagel Engine Logistics is delivered by specifically trained professionals.

Kuehne + Nagel's global Engine Logistics Centre of Excellence, based in the UK has been developed to meet worldwide needs. Dedicated Engine Movement Teams provide support, expert handling, extensive knowledge and expertise to move time critical, intricate aero engines on time, every time.

24/7 Worldwide Engine Logistics

The Engine Logistics Centre of Excellence offers:

- 24/7, 365 monitoring of all types of aircraft engines in transit, worldwide
- Global management of international movements, including scheduled freighter services
- Full and part charter, including origin / destination support
- Specialised transportation to reduce additional handling of engines, including airside delivery and collection of engines available
- Expert handling of all engine types
- Handling Sheets, customised for customers specific handling requirements.
- Close interaction with airlines to ensure adherence to strict handling procedures
- 24/7 customs clearance
- Bonded movements
- Reporting functions provide up to date information on your movement.
- On site project management
- Strong relationships with airlines ensure the best service and quotation.

Kuehne + Nagel's engine handling expertise ranges from out of production aircraft engines up to and including the Airbus 380 and Boeing 787 engines.

Trent 800, 900, 1000
