Kuehne + Nagel is one of the world's leading logistics providers. Across its global network of 830 offices in more than 100 countries, the company develops and delivers integrated logistics solutions of outstanding quality and operational excellence, tailored to industry and customer requirements.

Already a global leader in sea- and airfreight, Kuehne + Nagel also ranks among the top three worldwide contract logistics players. Our superior service and integrated supply chain management and warehouse & distribution solutions will turn your logistics challenges into a real competitive advantage.

Warehouse Management

Kuehne + Nagel's network of dedicated and shared (multi-client) distribution centers is the broadest in North America – 11 million square feet of warehouse space across 40 locations. For companies with changing distribution requirements, our shared warehouse network provides unmatched flexibility across the United States, Canada and Mexico. Agreements typically are short term, so you pay only for the space and services you need, when you need them. Kuehne + Nagel's shared warehouse solution enables you to:

- Quickly enter and leave markets, based on business demand.
- Put product closer to your customers, improving service and reducing transportation costs.
- Control warehouse costs by sharing overhead with other Kuehne + Nagel clients.
- Control manufacturing costs and reduce inventory by doing final product configuration in the warehouse.
- Drive consistency and quality. All facilities are ISO 9001:2000 certified.
- Monitor orders and inventory in real time via our Web interface.

Transportation Management

Kuehne + Nagel employs a non-asset-based approach to transportation management in North America, providing you with an unbiased, objective solution. Carriers are selected based upon their ability to maximize service, deliver value and meet your specific needs. Kuehne + Nagel's solution for overland transportation enables you to:

- Optimize transportation and cross-modal carrier utilization, using our advanced transportation management systems.
- Leverage Kuehne + Nagel's aggregate freight spend and related carrier purchasing power.
- Monitor shipments in real time.
- Reduce costs via complete freight audit and payment service.

From port to port and through to your customer, Kuehne + Nagel can store and ship your product – around the corner or around the world.
