Get lean, get agile.

**KN Control Tower**  Global supply chain excellence. In expert hands.

KUEHNE+NAGEL
Globally successful integrated logistics solutions

Unlock your full supply chain potential. Use our trusted expertise and resources to empower you to achieve new levels of efficiency and service.

Today’s global supply chains have become increasingly complex and fragmented. Markets are volatile, competition is intense, and customers are more demanding than ever. KN ControlTower experts develop, implement and manage solutions that streamline your supply chain to make it lean, agile and demand-driven.

Outsourcing logistics management gives you the opportunity to focus time and resources on your core business. As your lead logistics provider (LLP), we design and manage end-to-end solutions that simplify your supply chain as you make, deliver and service your products – facilitating rapid response and generating real long-term value.

KN ControlTower combines our industry expertise, logistics resources and innovative technology to provide essential network coordination that delivers enhanced visibility of the flow of goods, data and payments. This enables you to optimise your logistics operating costs, lead times and inventory levels.

KN ControlTower
A Kuehne + Nagel Integrated Logistics product that provides managed services tailored to meet customer needs, simplifying supply chain complexity through integrated end-to-end solutions.

KN ControlTower - YOUR SINGLE POINT OF CONTACT FOR COMPREHENSIVE, INTEGRATED LOGISTICS SERVICES

With our technology, resources and global reach, Kuehne + Nagel Integrated Logistics is ideally positioned to become your full-service partner of choice. Here are some of the key services we offer:

- Order fulfilment – easy-to-configure, flexible, secure and reliable order data integration – reducing cost to serve
- Transport management – planned and optimised shipments and streamlined communication between all parties
- Inventory management – improved warehouse and transport inventory
- Visibility & monitoring – real-time, full supply chain transparency for improved service levels and traceability
- Freight settlement – accurate and reliable management of billing, audit and payment activities
- Request & deviation management – maximised service levels through request tracking and incident handling
Enhancing flexibility and accelerating time to value

Our KN ControlTower supply chain professionals develop, implement and operate scalable solutions for greater flexibility and speed.

As your strategic partner, Kuehne + Nagel Integrated Logistics is your single point of contact for logistics execution and supply chain management services. Our logistics control centres deliver operational excellence — optimising transport, inventory and warehousing costs. And you will reap the rewards from greater visibility while getting leaner and more agile, achieving immediate impact and sustainable long-term improvement.

- End-to-end management – integrating all transport modes
- Enhanced visibility, monitoring and control
- Ease and simplicity through one single point of contact
- Integrated, state-of-the-art information systems
- Vertical industry expertise and specific solutions
- Synergies with the Kuehne + Nagel global network
